

## 国立医薬品食品衛生研究所特別講演会(殿町#3)

日時: 2018年7月12日 (木) 16:00-17:30 (開場15:30)

場所: 国立医薬品食品衛生研究所 2階 共用会議室

講師**: Dr. Huib Ovaa**Leiden University
Medical Center 教授

講演名

The Ubiquitin
Proteasome System

要旨

Modification of proteins with ubiquitin and ubiquitin-like proteins regulates a plethora of cellular events, ranging from DNA repair to proteolysis and intracellular trafficking. This lecture will deal with methods to chemically synthesize such proteins and discusses how to use them in structural, biochemical and cell biological studies with a range of examples. In addition the development of small molecule modulators of the ubiquitin proteasome system will be discussed.
